

## SUMMER SCHOOL PAPHOS 3-8 October 2023

### LIST OF POSTERS

Poster title	Authors
Recent Application Highlights of exciting	H. Kleine, S. Lubeck, J. Peschel, E. Stephan, M. Voiculescu, I. Gonzales Oliva and C. Draxl
excitingtools: An exciting workflow tool	F. Peschel, A. Buccheri, H. Kleine, E. Stephan, M. Voiculescu, B. Maurer, M. Kuban, C. Draxl
Unravelling the space group confusion in monolayer CrI <sub>3</sub>	R.R. Routaray, E. Bousquet, M. Giantomassi, and X. Gonze
Co-design Framework for Green's-Function-Based Methods: Mini-apps Suite Distribution	I.F. Mas Magre, R. Grima Torres, J.M. Cela Espín and J.J. Gutiérrez Moreno
Adaptively compressed exchange in LAPW	D. Zavickis
Radial Kohn-Sham solver - core orbitals in hybrid calculations	J. Uzulis, A. Gulans
Mapping Surface Morphology and Phase Evolution of Iron Sulfide Nanoparticles	Jinjia Liu
Cubic scaling GW in exciting	M. Hossain, A. Gulans and C. Draxl
xisdf - Interpolative Seperable Density Fitting for everyone	B. Maurer
Quantum chemistry using linearized augmented plane waves	K. Kacars
Second-harmonic generation tensors from high-throughput density-functional perturbation theory	V. Trinquet, F. Naccarato, G. Brunin, G. Petretto, L. Wirtz , G. Hautier, and G.-M. Rignanese
Approximation techniques for thermal expansion determination	S. Rostami and X. Gonze
Exploiting Multi-Fidelity Data through a Simple Denoising Approach for Machine Learning in Materials Properties	Xiaotong Liu
Variational Polaron Equations Applied to the Generalised Fröhlich Model	V. Vasilchenko, B. Guster, A. Zhugayevych and X. Gonze
First-principles study of the luminescence spectrum of point defects: case study on SrLiAl <sub>3</sub> N <sub>4</sub> :Eu <sup>2+</sup> phosphor	J. Bouquiaux
Dielectric properties of metallic nanoparticles from 2nd-Principle computations	A. Cloots, L. Henrard, X. Gonze
Anharmonic electron-phonon coupling in polymorphous perovskites (ULTRA-2DPK)	M. Zacharias and J. Even
